Data Analysis PowerPoint (Follow up to Graphical Analysis)

Objectives:

1) Be able to name and describe the steps of graphical analysis
2) Understand the logic of data analysis
3) Be able to generate an equation from a set of data using data analysis

Thinking Goal(s): Explicitly assess information and draw conclusions

Data Analysis Lab

Objectives:

1) Derive an equation from a set of data by using both graphical and data analysis
2) Show an understanding of the terminology of data and graphical analysis such as specific and general proportions

Thinking Goal(s): Organize, apply, and communicate knowledge accurately
